Thingamejig's Scribing Tool saves you time and achieves precision results.

It's single handed use, frees up one hand to steady the item you are scribing whilst reducing your body from being in a prone position.

The adjustable blade height ensures an accurate marking with the ability to retrace your steps.

The Thingamejig scribing tool is constructed with lightweight anodized aluminium so it won't rust with the blades made from highly durable Tungsten Carbide. To ensure precision results, the tool's measuring ruler has been laser cut with your choice of imperial or metric indicies.
